PLAN 4

Why do we use a tanning lotion?

Tanning Lotion protects your skin during tanning and provides the best tanning results! Moisturized skin accepts UV light better.

• Skin Reaction to UV Light •

Moisturized Skin

Dry Skin

Bronzer — Have ingredients that provide immediate and/or delayed bronze color

Accelerators — Accelerate your tan without the use of Bronzers to build your natural color

It is recommended to mix up your routine with an accelerator every few weeks to avoid plateauing.

Tanning Goggles

PODZ[®]
E Y E W E A R
"Protecting the Worlds Most Beautiful Eyes"

Quick Facts:

- Failure to wear goggles **Increases risk of eye cancer**
- **UV light goes through eyelids**, which offer no real protection at all, and can cause a variety of things that you do not want (photokeratitis, pterygium formation, cataracts, or macular degeneration)

Think of shining a flashlight though your fingertips. If that light can penetrate your fingers, imagine what the stronger UV light does to your eyelids (which have the thinnest skin of the body)

- **Contact lenses and sunglasses do not cover the entire eye**, so they cannot be used instead of goggles.
Think of being in a pool and wearing swimming goggles. If the goggles are loose, water gets in. Tanning bed goggles are the same way, except it is UV light that is trying to get in
- **Towels are not an acceptable alternative**, as they do not block UV light
- **Just one tanning session without eyewear can damage your eyes, making them a leaky, burning mess. Plus, eyelids do not tan!**

Tips for Buying a Tanning Lotion

Why do you need a tanning lotion?

Hydration and Tyrosine! UV light needs somewhere to pull moisture from. If the UV light is pulling moisture from your dry skin, this will lead to accelerated aging and your color will not last a long time. Tyrosine is the ingredient that stimulates your melanin activity and accelerates your tan by 60%.

Do you prefer Bronzers or Accelerators?

Bronzers contain instant and delayed color, and accelerators are a blend of moisturizer + tyrosine. Do you prefer building your natural color or getting an instant pop of color and extra delayed color?

Do you have any Tattoos?

Try one of our lotions that have Tattoo and Color Fade Protection! This will help keep your tattoo looking fresh and prevent them from fading.

Hate after tan odor?

Try one of our lotions that have after tan odor eliminators so you will smell like the lotion when you finish your tan, and not like tanning!

Do you use Redlight + Tanning?

Try a lotion that is formulated for the tanning bed plus redlight, or you can always go with our "Collagenetics 2 in 1" which is formulated for optimal redlight absorption!
